

Robinsons Special Rainwater Kit Example

In order to join two gutters across the rear of a freestanding Robinsons greenhouse In addition to the standard downpipes kit supplied you will need to purchase:

2 x 90 degree bends <http://www.greenhousepeople.co.uk/products/3026/90-degree-bend/>

1 x t – piece <http://www.greenhousepeople.co.uk/products/3028/t-joint-for-pipe/>

1 maybe more on a wider building x straight connector <http://www.greenhousepeople.co.uk/products/3027/straight-joint-for-pipe/>

More pipe clips <http://www.greenhousepeople.co.uk/products/2039/downpipe-bracket-green-d841g/>

1 x 45 degree bend <http://www.greenhousepeople.co.uk/products/2036/downpipe-outlet-shoe-d207/>

You may also need to buy some more 1600mm pipe lengths depending on the width of your building <http://www.greenhousepeople.co.uk/products/2033/downpipe-63-1600mm-d211/>

Below is the sort of arrangement possible, please be aware that not all of the pipe sections are shown on this model so that the individual components stand out more.
